DO YOU FIND IT HARD TO RECRUIT AND RETAIN THE RIGHT CALIBRE OF ENGINEERING STAFF?

Shorterm Group is a specialist Engineering Recruitment company and with our training partner **Qualitrain**, we look to help solve what is now a widely recognised skills shortage in the UK by training engineers of the future.

Qualitrain & Shorterm work in partnership to design & develop a fully funded **bespoke** training & recruitment framework to help shorten this skills gap. We achieve this by **upskilling** staff through fully funded pre employment training, which results in **vacancies being filled** and prevents the inflation of rates. From 2010 to date, we have successfully trained over **1000** engineering candidates.

The outcome for you as an employer is a **fully trained** competent worker entering your workforce prior to day one with the **skills required** based around your core competencies.

124,000
engineers and technicians with core engineering skills required per year

59,000
annual shortfall of skilled engineers

of employers reporting recruitment difficulties
