Safety in the Workplace

Return to Work - Safely

Step 1: Ensure that you have reviewed the guidance and expert advice available:

<https://www.gov.uk/government/publications/help-and-support-for-returning-to-work>

<https://www.makeuk.org/news-and-events/news/back-to-business-support>

Step 2: Take every possible step to reduce risk to your employees without cost:

Putting up advisory signs, making hand sanitising mandatory, implementing split breaks, moving desks away from each other, positioning desks so that employee's backs are to each other etc.

Step 3: Invest to further reduce risk to your employees and give them to confidence to return to work knowing that their employer has put precautions in place:

- Site Entrance: Temperature checks on entrances for employees, contractors and visitors
- All Access Doors: Fitting foot / arm operated door handles to doors
- Desk / workspace Areas: protection screens
- Installing hand wash and sanitiser stations in easily accessible locations

Standard Products:

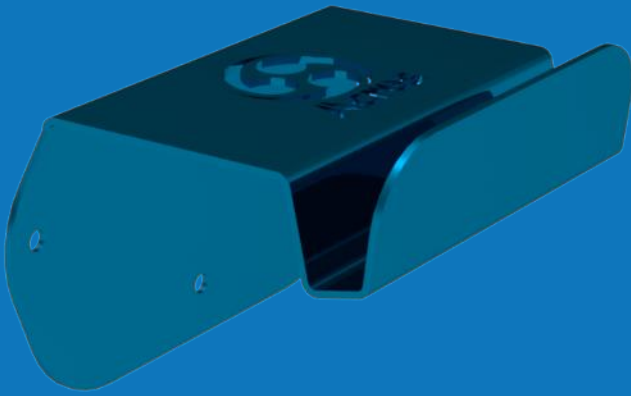

Off the shelf items. You can either send in a purchase order for our standard products quoting the item number and price, or you can engage with us on a custom project.

Custom Solution:

If you would like us to design up a custom solution, as we have for other leading companies such as Tarmac, Caterpillar and Amazon our initial engagement fee is £600.00 we will hold 3 virtual meetings with your team: project initialisation, design review and design sign off. We will then produce a full proposal with costings. This process typically takes 2 days.

Avoid the risk of infection by reducing contact with door handles. The hands-free door opener (Footle) provides a germ-free option when accessing areas with 'pull doors'

Benefits / Specification

- Easy to install
- Adhesive options for doors with kick plates
- Reduce Spread of infection
- Reduce time spent disinfection doors

The Footle can be used in two ways:

Pulled from underneath with the toe of the shoe or gripped from above with the sole to prevent scuffing.

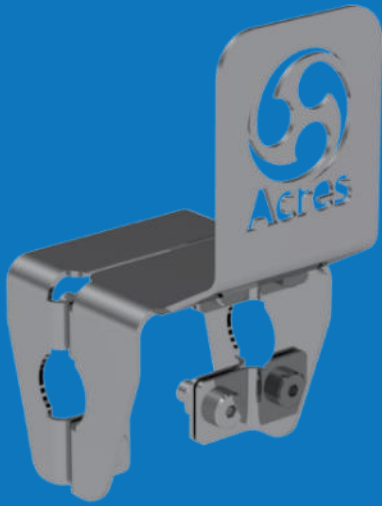

In the current climate every step should be taken to ensure possible transfer of Covid-19 is minimised.

A simple yet effective addition to any door for any company

ARM
HANDLE

'The Arm Handle allows persons to open Pull handle doors without touching the door handle with their hands.'

Benefits / Specification

- Reduce spread of infection
- Reduce time spent disinfecting doors.
- Designed to grip to an existing door handle and be non-destructive so they can be removed later having caused no damage to the door.
- Easy to install, requiring only a wrench and allen key.

In the current climate every step should be taken to ensure possible transfer of Covid-19 is minimised.

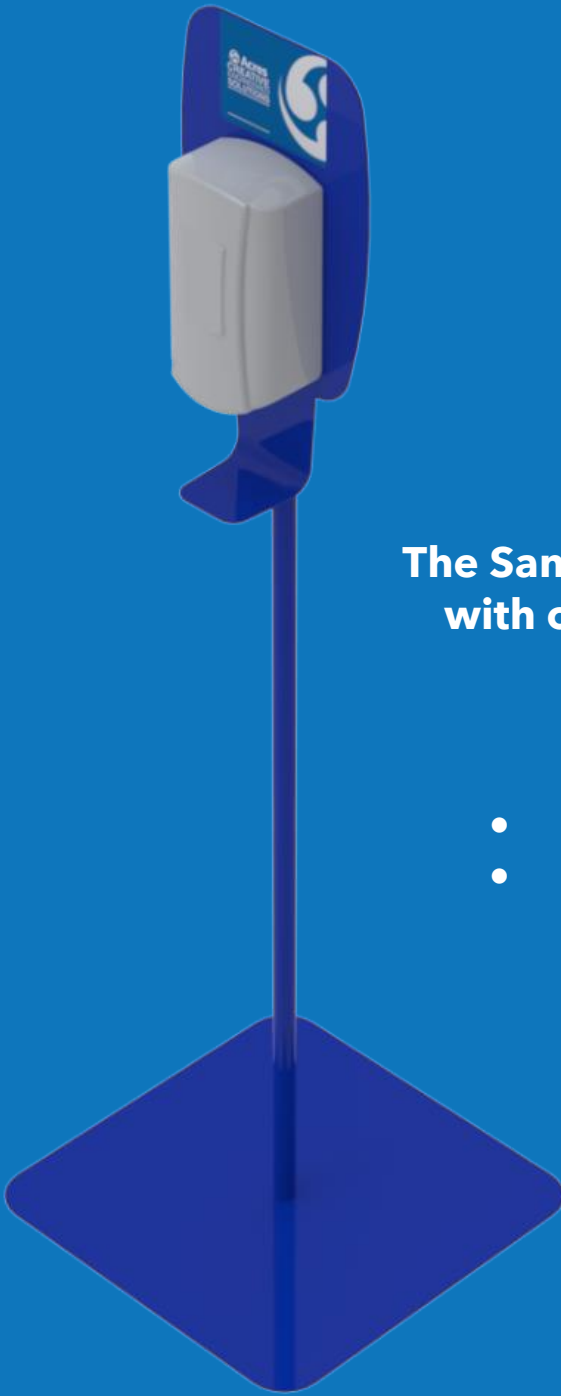

'Provide additional hand sanitisation stations for your staff.'

The Sanitiser Dispenser Stand can come supplied with optional extras such as mounts/ brackets for items such as nitrile glove boxes.

- 1.5m tall, easy to manoeuvre and position
- Great for both indoor or outdoor use.

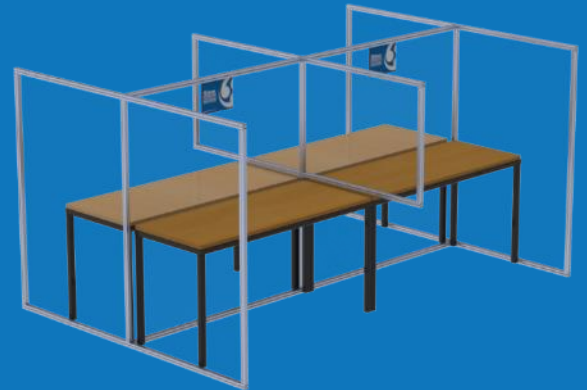

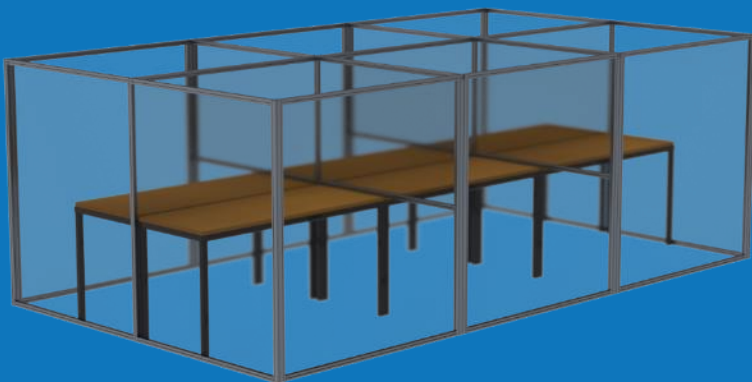

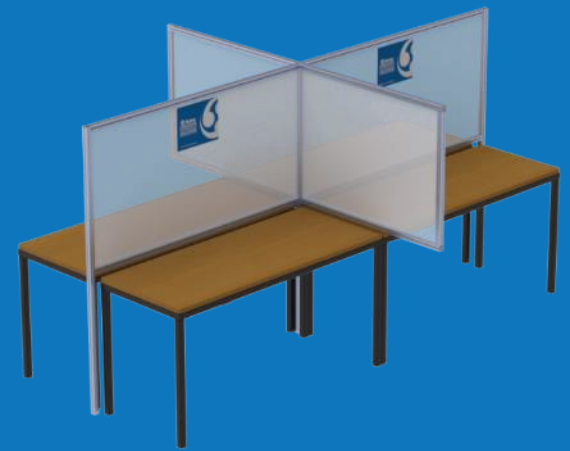

'A semi-permanent desk separation solution designed to mitigate the risk to office staff when returning to work.'

Benefits / Specification

- Modular design can be adapted to most office setups.
- Multiple levels of protection for varying amounts of foot traffic.
- Light-weight aluminium frame makes moving and assembly easier.
- Can include hinged panels to allow for full enclosure.
- Wipe clean surface - quick to disinfect.

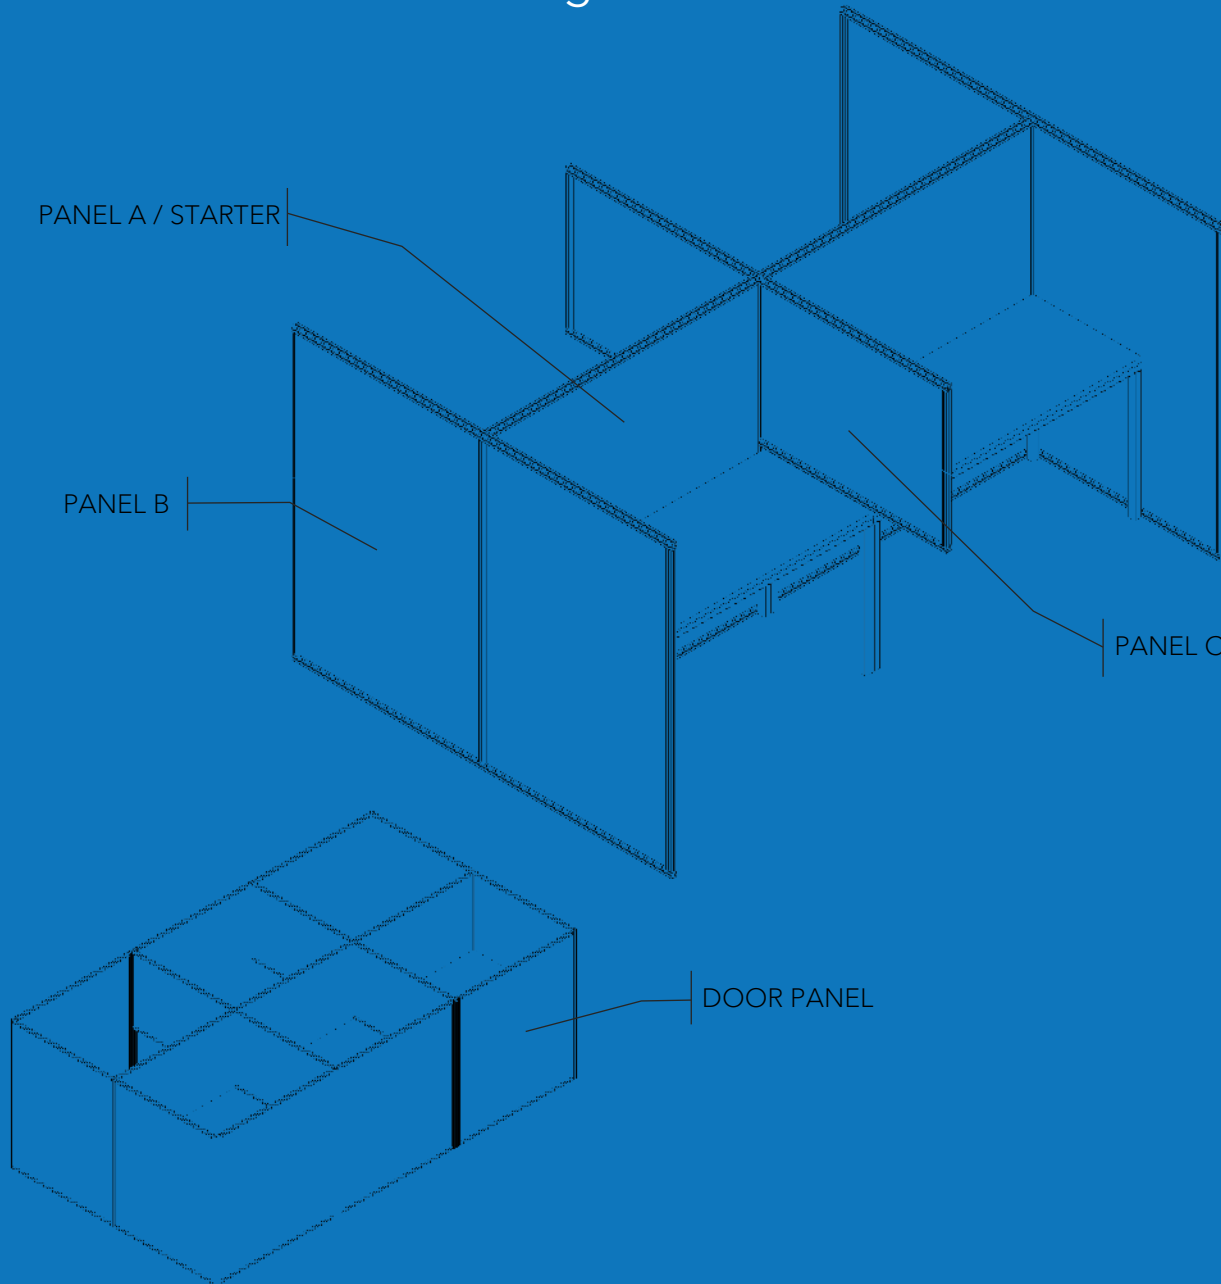

'Protects staff without completely closing them off from one another allowing communication and interaction to continue as before.'

DESK **DIVIDERS**

'A semi-permanent desk separation solution designed to mitigate the risk to office staff when returning to work.'

Desk Divider Panels

The Desk Dividers are constructed of modular panels so that they can be arranged to suit as needed with your office layout. The panels come in 3 sizes as well as a hinged "door" panel.

All arrangements require at least 1 "starter" panel from which the dividers can be assembled. Panel A comes in 2 sizes to fit to the 2 most common desk widths, 1.2m and 1.6m. A fully assembled Divider is 2m tall.

Price per unit:

Panel A 1.2m (Starter):	£295
Panel A 1.6m (Starter):	£420
Panel A 1.2m:	£240
Panel A 1.6m:	£400
Panel B:	£325
Panel C:	£215

Door Panel: £400

Panels come flat packed to be assembled on site.

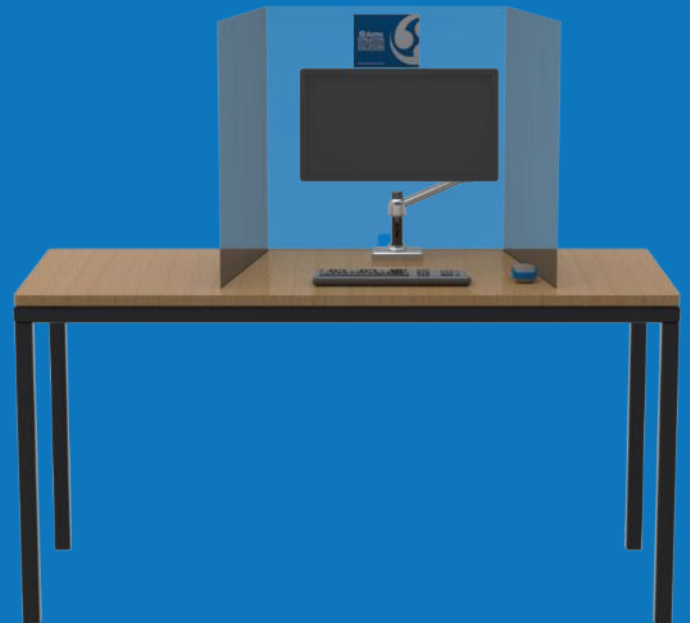

**DROP ON DESK
SEPARATORS**

'Simple drop on desk separation solutions designed to mitigate the risk of office staff returning to work'

Benefits / Specification

- Come in 2 designs, the "U" & "L" shaped separators to accommodate different office set ups.
- Cost effective.
- Simple to rearrange.
- Fast deployment.

Designed for low foot traffic areas to help achieve safe distancing and separation of staff.

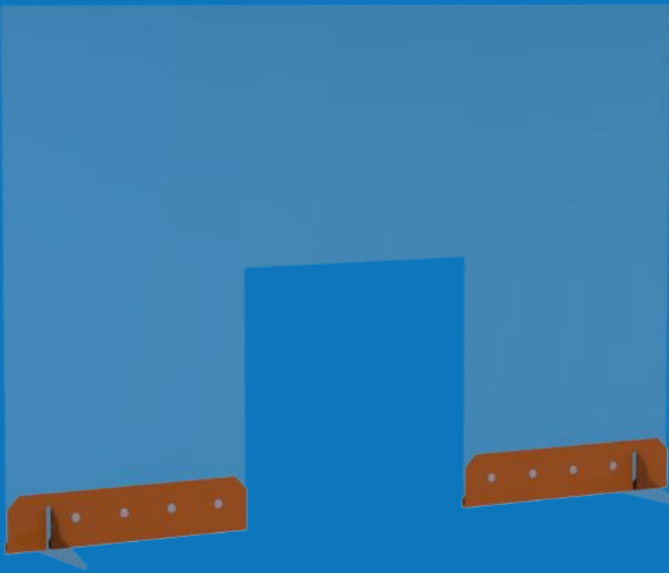

'The health station allows temperature checks of personnel whilst protecting staff who are administering health checks.'

Benefits / Specification

- The health station enables companies to safely reduce the risk of frontline workers.
- Robust transparent polycarbonate sheeting with access point for measuring temperature.
- Free standing or floor mounted
- Reduce the spread of infection.

'A set of bar top dividers in 2 designs. Can be supplied with or without steel reinforcement.'

The Designs

- The Bar Top Dividers come in 2 types, those with an access slot and those without.
- The overall dimensions are 900 x 600mm but can be custom sized to client specifications.
- Can be supplied as stand-alone polycarbonate or with steel reinforcement to increase stiffness and weight. Steel can be powder coated to client specified RAL colour in quantities of 10+.
- Units come flat packed and feet are assembled on site.

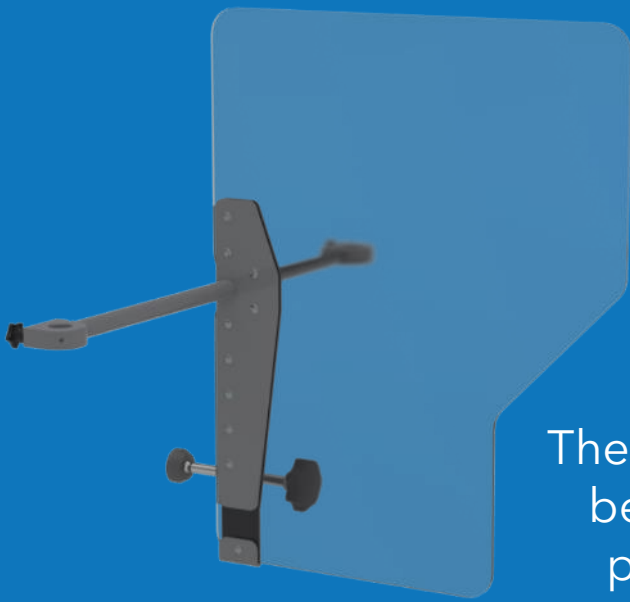

Prices:

Steel Reinforced: £130 per unit

Non-Reinforced: £90 per unit

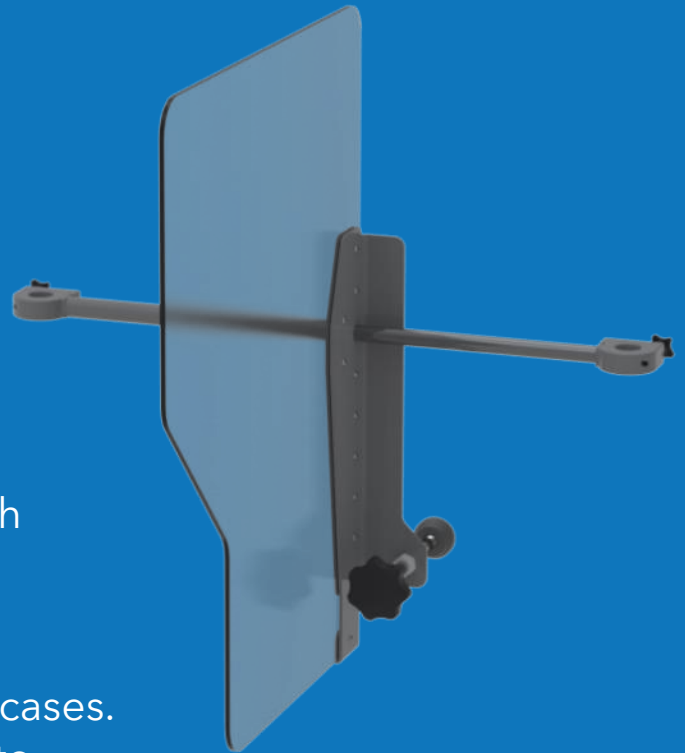

The driver shield provides a protective barrier between driver and passenger(s). This is the perfect solution for courier drivers, delivery personnel, freight forwarders.

Benefits/ Specification:

- Bespoke Item designed to fit your vehicle perfectly.
- Developed for transit/panel vans with a concept designed to adjust to a variety of vehicle shapes and sizes.
- Non-destructive mounting fixtures meaning that they will be perfect for leased vehicles and when the pandemic is over can be removed with no permanent damage to the vehicle.

For some industries personnel must travel together, there is no other option in some cases. In these situations, it becomes impossible to maintain social distancing and requires the use of adequate PPE to reduce the spread of infection.

The Driver Shield is designed to create a physical barrier between the driver and passenger helping to mitigate the possible spread of Covid-19 and allowing personnel to more easily do their jobs.

Fast deployment automatic temperature station...

CREATIVE
ENGINEERED
SOLUTIONS

Fast Deployment
Automatic Temperature
Station

Any object with temperatures above absolute zero emits a detectable amount of radiation

A thermal camera converts IR radiation into grayscale values, and matches grayscale values to temperature values through an algorithm model.

Thermal cameras with high temperature accuracy can help detect elevated body temperatures which may indicate the presence of a fever. Thermal cameras can be used for the fever screening of travellers, shoppers, and office workers.

- Solution Advantages
High Efficiency: It takes only one second for a thermal camera to detect temperature of a person, thus allows screening of large numbers of people at a time
- Safety: Thermal cameras feature non-contact temperature measurement from about one meter away, avoiding unnecessary physical contact

Specification Advantages:

- Thermal resolution of 384*288, providing more image detail and wider coverage for temperature measurement >The 15 mm thermal lens provides a fever screening range of 3 to 5 meters, fitting for long-range use, can be used with handheld thermographic camera
- Fixed solution not only for temporary use but also for long term use
- Accuracy is $\pm 0.5^{\circ}\text{C}$, satisfying preliminary fever screening requirements
- Supports 4 MP optical channel, satisfying regular monitoring requirements

What is supplied:

- Thermal Camera – Turret 6mm Lens - this will provide +or- 0.5 Degrees suitable for most Requirements >DEEPINMIND NVR RECORDER WITH 4TB HDU - 16CH DEEP IN MIND SOFTWARE, 2 X LAN >Tripod + Mounting Bracket
- Accessories and leads
- Delivery - Installation & Configuration
- Deep in mind can be turned on or off, but the benefits are that it uses AI to detect if employees are wearing masks, and who are not and identifies those people. Can also detect other PPE.
