ENCOMPASS ENGINEERING

We help TOCs meet their handback obligations

Comprehensive dilapidation assessments and tailored plans to ensure trains are handback-ready.

WHO WE ARE

We are an engineering assurance consultancy, that help rolling stock owners, freight and train operators keep their trains and depots in good working order and up to standard.

We have decades of experience and excel at technical challenges. Our strength lies in our attention to detail and hands-on approach, and we work right alongside you, slotting into your existing project teams.

WHAT WE DO

One of our core services is providing detailed assessments of trains at key stages - including lease handback, following long-term use, or before, during and after refurbishment.

Our assessments are tailored to your specific obligations and liabilities and include step-by-step plans to resolve any issues, cost breakdowns and actionable recommendations.

FULL UNIT ASSESSMENTS

Thorough inspections of the interior, exterior and underframe.

COMPONENT ASSESSMENTS

Individual checks to assess the condition, functionality, and compliance of key train parts.

SPARES & SPECIALIST TOOLING ASSESSMENTS

Evaluation and reporting on the condition of owner-owned spares and specialist equipment.

COMPREHENSIVE ACTION PLANS

Clear guidance to address any issues found, with full costs and priorities outlined.
