Proposal

It is proposed that from Autumn ‘25, Initial Signaller Training will relocate from York to the Doncaster Training college.

- The rail college has a 3-floor footprint
- We will occupy two floors with a partner occupying the top floor
- GBR ready integrated training facility
- Opportunity to revive the centre and bring talent into our industry in Doncaster and the surrounding areas

Benefits

- NR would occupy a modern state of the art efficient facility increasing the resilience of the railway, ensuring training needs are met.
- Located at Doncaster lakeside, next to two hotels and a retail park offering accommodation and dining options for delegates on extended courses.
- Opportunity to repurpose a site which provides great opportunity for both indoor & outdoor training
- Integrated training preparing our people for rail reform (track & train)
